Aanchal

PROJECT PLAN & MARKET STUDY · PHASE 1

Complete care for mother & baby — from first heartbeat to first steps.

A pregnancy-to-18-months home-care platform for the Chandigarh Tricity: verified daai-maa care, in-house nurses, partner doctors, flexible plans.

PREPARED FOR	LAUNCH MARKET	DATE	VERSION
Client review	**Chandigarh · Mohali · Panchkula**	**31 October 2026**	**1.0 — Draft**

AT A GLANCE

Executive summary

Indian families still rely on word-of-mouth for the most important 18 months of their lives. Pregnancy care is scattered across doctor visits, WhatsApp forwards and relatives' advice; after delivery, an unverified daai or japa maid is hired informally. **Aanchal** brings all of it into one trusted, app-led service.

~23M
births a year in India[4]

<48h
typical hospital stay after delivery — the 40-day recovery is uncovered[4]

₹15–35k
per month paid to informal jaapa-walis, no standards[4]

~22%
pooled postpartum-depression rate, rarely screened[4]

The opportunity

- No Tricity provider covers **pregnancy → delivery → 18 months** end-to-end.
- National home-health brands (e.g. Apollo HomeCare) do not list Chandigarh; local agencies publish no prices and have no app.
- Traditional baby massage is in high demand but delivered by untrained, unverified individuals.
- Pronto has proved that verified, trained, app-dispatched home workers scale fast (≈18k bookings/day within ~18 months)[2].

What we offer

- Stage-wise care from month 1 of pregnancy: nurse visits, diet, scans & appointments, yoga, classes.
- Post-delivery: daai-maa baby & mother massage, first bath, japa shifts, lactation, physio.
- Baby 0–18 months: vaccines, growth, weaning, sleep, paediatric access.
- Full plans (9/12/18 months) *and* small packs (40 days, 3 months, single visits).

Operating model

> **Hybrid.** Core caregivers (daai-maa, japa, GNM/ANM nurses) are **in-house**, trained and verified. Doctors, hospitals, labs and physios are **partners** on commission. Nurse visits go to in-house staff first.

Technology

.NET MVC admin panel + ASP.NET Core Web API · EF Core · SQL Server · React Native Android app (customer now, caregiver later).

Roadmap

Plan & templates (now) → API + admin (10 wks) → customer app (10 wks) → 3-month pilot in 2 Tricity zones → caregiver app & Punjab expansion.

Brand name options

Aanchal · MaaSathi · Navya Care

"Aanchal" (a mother's protective embrace) is used as the working name. All three need trademark & domain checks.

02 · MARKET GAP

India has the tradition, but no industry

The 40-day *jaapa* (Ayurveda's *sutika paricharya*) is one of the world's oldest postpartum traditions. Yet there is no licensing category, no standard training and no insurance for it — while China, Taiwan and Korea have turned the same tradition into regulated industries.[4]

Where families struggle today

Qualitative severity ranking from desk research — to be validated with 50+ family interviews in Tricity (see Next steps).

Why now

- **Proven model:** Pronto, Snabbit and Urban Company InstaHelp show that families will book verified home workers through an app; Pronto grew from 1 hub to ≈18k bookings a day.[2][3]
- **Nuclear families** are growing; grandparents often live in another city or abroad.
- **Higher spend per child:** families with one or two children invest in quality care.
- **Data-protection clarity:** the DPDP Act 2023 sets rules for consent-based health data.
- **Hospitals want continuity:** maternity hospitals lose contact after discharge — partners for referral.

The care gap we fill

Pregnancy
Doctor visits every 4 weeks; nothing in between at home.

→

Delivery
1–3 days in hospital, then discharged.

→

Day 3 – 40
Biggest need, least support. Informal maids, no checks.

→

Months 2–18
Vaccines & milestones tracked on paper or not at all.

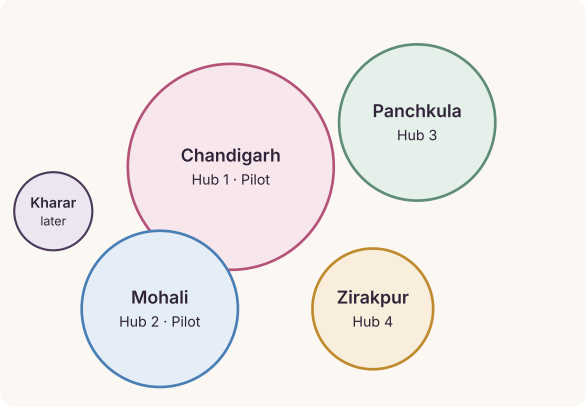

> **Aanchal's promise:** one care manager, one app and one trained team for the whole journey, so no stage is left uncovered.

03 · LAUNCH MARKET

Chandigarh Tricity

A planned, high-income, compact metro region with strong private maternity hospitals and a large catchment from Punjab, Haryana and Himachal — ideal for a hub-based home-care pilot.

Service zones (hub plan)

Schematic, not to scale. Each hub = a caregiver base + nurse desk with a ~30-minute visit radius.

~2.8M
Tricity population incl. Zirakpur/Kharar (estimate)

~39k
births/year, est. at ~14 per 1,000 people

~13.6k
addressable urban mid/high-income families per year (35%)

~1,100
families/yr target by Year 3 (8% share)

Estimates for planning only. Validate with Census/SRS data and hospital delivery volumes before investment decisions.

Existing ecosystem in the Tricity

TYPE	EXAMPLES	WHAT THEY DO	OUR RELATIONSHIP
Maternity hospitals	Cloudnine (Chandigarh, Panchkula), Motherhood (Mohali), PGIMER, GMCH-32, private nursing homes	Antenatal OPD, delivery, classes	Partner & referral
Home-care agencies	Max@Home (Panchkula pages), local nursing bureaus	Japa maids, nursing; prices on request[5]	Compete
Beauty & spa apps	Urban Company (Chandigarh spa)	Adult massage at home; no newborn care	Compete (adjacent)
Informal daai / maalishwali	Word-of-mouth individuals	Baby & mother massage	Recruit, train, certify
Diagnostics	Chain & local labs	Home sample collection	Partner

04 · COMPETITION

How we compare

Every competitor covers one slice. Nobody connects pregnancy, delivery and the baby's first 18 months with both traditional and clinical care.

CAPABILITY	AANCHAL	APOLLO HOMECARE	MAX@HOME	CLOUDNINE / MOTHERHOOD	URBAN COMPANY	MYLO / HEALOFY	LOCAL DAAI

Our wedge

Certified daai-maa massage + first bath, the most emotional and most-asked-for service, sold as a ₹499 entry product.

Our moat

Trained, verified, in-house caregivers, plus hospital and doctor partnerships that refer patients at discharge.

Our retention

An 18-month journey with trackers and care credits. One customer stays ~18× longer than a one-off spa booking.

05 · REFERENCE STUDY

Learning from Pronto's business flow

Pronto (house help in ~10 minutes) is used only as a reference for **operating model and UX ideas**. No design, text or assets are copied.

≈18k
bookings a day, up from ~1k a year earlier[2]

4.5★
App Store rating from ~61k ratings[3]

50 / 300
candidates pass screening; 5-day training on 14 services[1]

Pronto's three-sided system

Customer app
Choose services → Instant / Scheduled / Recurring → live price → pay in app (UPI, card, wallet) → track the Pro → rate.

⇄

Ops console
Hub polygons, auto-matching, reassign if a Pro can't attend, SOS line, hub managers, refresher training.

⇄

Professional app
Guaranteed shifts, job queue, check-in, earnings, insurance. Verified with Aadhaar/PAN + police clearance.

PRONTO PATTERN	HOW AANCHAL ADAPTS IT
Micro-hubs with a 10-minute polygon	4 Tricity hubs with a ~30-min radius. Care is planned, not instant, except the SOS / nurse-on-call line.
Instant / Scheduled / Recurring booking	Single visit / scheduled / **plan-driven auto-schedule** (e.g. daily massage for 40 days, generated from the due date).
Pronto Pass (minutes, savings, priority)	**Care Credits** wallet: plans load credits; any service can be redeemed against them. Priority for plan members.
Strict screening + 5-day training	3-tier academy: Daai-maa (massage, bath, hygiene, red flags), Japa (newborn + mother care), Nurse (clinical SOPs).
Auto-reassign when a Pro is unavailable	Same. Plus a **primary caregiver** assigned per family for continuity; a backup is introduced in week 1.
Cashless, no hidden fees	Same. Plus EMI for large plans and **gifting** (baby shower / godh bharai).
Reported issues: late visits, slow support, refunds[3]	SLA timers in admin, a single care-manager per family, WhatsApp support, auto-credit on missed visits.

Month-by-month services

Care starts **as soon as the mother knows she is pregnant** — month 1 or later. A mother can join at any stage; the app builds her plan from her due date. All tests and vaccines follow her doctor's advice; we schedule, remind and coordinate.

Month 1–2

Weeks 1–8
"Just found out"

HEALTH & CHECKUPS

- Welcome call from a care manager + app onboarding (LMP, history, family)
- In-house nurse home visit: BP, weight, Hb, sugar, risk screening
- First gynaecologist appointment with a partner doctor
- Home sample collection for first-trimester blood tests (as prescribed)
- Dating / viability scan booking (6–9 weeks)

DIET, REST & WELLBEING

- Personal diet plan: nausea-friendly, folate- & iron-rich foods, veg / Jain / Punjabi menus
- Supplement reminders (as prescribed)
- Sleep & rest routine, what to avoid
- Emotional check-in; "Welcome to motherhood" kit

Month 3

Weeks 9–13
End of trimester 1

HEALTH & CHECKUPS

- NT scan + double-marker scheduling (11–14 weeks) at partner labs
- Monthly nurse visit and vitals log in the app
- Td/TT vaccine reminder as per the doctor
- Thyroid and other follow-up tests if advised

DIET, EXERCISE & SLEEP

- Trimester-1 diet review by dietitian
- Gentle walking plan (doctor-cleared)
- Sleep posture guidance; hydration tracker
- Family session: how relatives can support

Month 4–6

Weeks 14–27
Trimester 2

HEALTH & CHECKUPS

- Monthly nurse home visits (BP, weight, Hb, swelling, fundal check)
- Anomaly (level-II) scan booking, 18–20 weeks
- Glucose tolerance test (OGTT), 24–28 weeks, home collection
- Quadruple marker if advised; partner dental check-up
- Monthly gynae appointment reminders & reports vault

DIET, EXERCISE, SLEEP, LEARNING

- Iron- & calcium-rich diet, gestational-diabetes diet if needed
- Prenatal yoga 2×/week (home or online)
- Left-side sleep coaching, back-pain care
- Childbirth class series begins (mother + partner)
- Add-ons: garbh sanskar, maternity photoshoot, godh bharai planning

Trimester 3 & delivery

Visit frequency increases as the due date approaches. The care manager prepares the home, the family and the post-delivery caregiver well before labour.

Month 7
Weeks 28–31

HEALTH & CHECKUPS
- Nurse visits every 2 weeks
- Growth scan booking if advised; Tdap reminder as per the doctor
- Daily kick-count tracker starts in the app, with alerts

PREPARATION
- Breastfeeding class; birth-plan worksheet
- Prenatal physio for back & pelvic pain
- Hospital tour coordination with a partner hospital

Month 8
Weeks 32–35

HEALTH & CHECKUPS
- Nurse visits every 2 weeks; NST / Doppler coordination if advised
- Diet: smaller frequent meals, heartburn care
- Breathing & relaxation sessions for labour

HOME & FAMILY READINESS
- Meet-and-match with the post-delivery japa / daai-maa
- Nursery setup & safe-sleep guidance; home sanitisation booking
- Elder orientation for joint families (traditions + safety)
- Insurance cashless pre-authorisation help

Month 9
Weeks 36–40
Pre-delivery

HEALTH & CHECKUPS
- Weekly nurse visits; labour-sign education
- 24×7 nurse helpline; SOS button in the app
- Light, energy-rich diet plan

DELIVERY LOGISTICS
- Hospital-bag checklist for mother & baby
- On-call cab / ambulance tie-up
- Caregiver on standby from week 37; family contact tree

Delivery
Hospital stay

- Hospital liaison from Aanchal for family updates (incl. relatives abroad)
- Birth registration & document guidance
- Home readied before discharge: sanitised room, baby corner
- Caregiver arrives on discharge day; first nurse visit within 24h

Mother & baby, day 1 to month 18

This is the traditional *sutika* period, delivered with clinical safeguards. Massage and the first full bath start only after a doctor's clearance; until the cord falls off, the baby gets sponge baths.

Day 1–10
At home

BABY
- Nurse visit: weight, temperature, jaundice watch, cord care
- Sponge bath & nail care; feeding & diaper log in the app
- Birth-dose vaccine record (BCG, OPV-0, Hep-B)

MOTHER
- Stitch / C-section wound care; BP & bleeding check
- Lactation consultant visit
- Sutika diet: ajwain water, panjiri, gond laddoo (as tolerated); cook add-on

Day 11–40
Sutika period

BABY
- Daily daai-maa baby massage (traditional oils, trained technique)
- **Baby's first full bath** by a trained daai-maa
- Japa caregiver: day, night or 24×7 shifts

MOTHER
- Mother massage after doctor clearance; optional belly binding
- Postpartum-depression screening (EPDS) at weeks 2 & 6
- 6-week postnatal check-up booking

6 wk – 3 m
"Navjaat"

- Vaccines at 6, 10 & 14 weeks: reminders & partner-clinic booking
- Growth chart (WHO), sleep routine, colic support
- Massage moves to 3×/week (pack)
- Postnatal physio: pelvic floor, diastasis recti, back
- Return-to-work plan; nanny matching

3 – 6 m

- Tummy-time & milestone coaching; paediatric tele-consults
- Weaning readiness & first-foods plan at 5–6 months

6 – 12 m

- Solid-food diet plans by month; 9-month vaccine reminders
- Babyproofing audit at home
- Development play sessions; mother's fitness plan
- First-birthday planning add-on

12 – 18 m
Toddler

- Toddler nutrition; MMR & booster reminders
- Walking & speech milestone checks
- Mundan / naming-ceremony coordination (add-on)
- Sibling-planning & next-pregnancy counselling

Add-ons, in detail

Add-ons can be bought on their own or redeemed with Care Credits from any plan. Prices are indicative launch prices for the Tricity, excluding GST.

ADD-ON	STAGE	WHAT'S INCLUDED	WHO	INDICATIVE ₹
Pregnancy				
Prenatal yoga at home	Month 3–9	60-min trimester-safe session, breathing, posture	Partner instructor	799 / session
Garbh sanskar program	Month 4–9	Music, reading & meditation, 8 sessions (online/home)	Partner	3,999
Childbirth & parenting class	Month 6–8	4 sessions for couple: labour, breastfeeding, newborn handling	In-house nurse	2,999
Godh bharai / baby-shower planning	Month 7–8	Décor vendor, catering list, gift a care plan	Partner	On quote
Maternity photoshoot	Month 7–8	Home / studio, edited photos	Partner	From 4,999
Home lab collection	Any	Sample pick-up, report in app vault	Partner lab	Lab price + 99
Gynae tele-consult	Any	15-min video consult with partner gynaecologist	Partner doctor	499
Family				
Parents-abroad update pack	Any	Weekly video call with caregiver, photo diary	Care manager	999 / month
"Dadi-on-call" mentor	Any	Experienced mother-mentor on chat/call	In-house	1,499 / month
Home sanitisation	Month 9	Deep-clean of mother & baby room before arrival	Partner	1,999

Bundle logic

Every plan includes a credit buffer (≈10%) so families can try add-ons without a new payment.

Partner add-ons

Yoga, photoshoots, labs and events are delivered by vetted partners; Aanchal earns 10–20% commission.

Gift-able

Any add-on can be gifted by relatives, e.g. "10 massages for my daughter-in-law".

After-delivery add-ons

These are the most-booked services. Daai-maa massage and the first bath are the entry products that lead families into plans.

ADD-ON	STAGE	WHAT'S INCLUDED	WHO	INDICATIVE ₹
After delivery — baby				
Baby massage (daai-maa)	Day 7+ *	45-min traditional massage, oil included, hygiene kit	In-house	499 · 10× 4,499
Baby's first bath	After cord falls *	Bath, cord check, nail & hair care, parent coaching	In-house	699
Night nanny / japa	0–3 m	12-hr night shift: feeds support, burping, settling	In-house	22,000 / month
24×7 live-in japa	0–3 m	Mother + baby care, light cooking for mother	In-house	32,000 / month
Baby photoshoot	0–12 m	Newborn / monthly milestone shoot	Partner	From 3,999
Babyproofing audit	6–9 m	Home walk-through, checklist, kit fitting	In-house	1,499
After delivery — mother				
Mother massage (abhyanga)	After clearance *	60-min postnatal massage + optional belly binding	In-house	799
Lactation consultation	Day 2+	Home visit: latch, positions, supply plan	In-house / partner	1,199
Postnatal physio	6 wk+	Pelvic floor, diastasis recti, back care	Partner physio	899 / session
Sutika cook	0–40 days	Traditional postpartum meals, 2 visits/day	In-house	12,000 / month
Counsellor sessions	Any	Video / in-person, triggered by EPDS score or on request	Partner	999 / session

* Starts only after paediatrician / gynaecologist clearance.

> **Daai-maa promise:** traditional technique your elders trust, done by a trained, police-verified caregiver who uses a sealed hygiene kit, gloves when needed and doctor-approved oils, and knows newborn red flags.

08 · BUILT FOR INDIAN FAMILIES

Nuclear & joint families

A mother's care is a family affair. The app gives each family member a role, and services adapt to who is at home.

Nuclear family

Working couple, grandparents in another city or abroad.

- **Night-shift japa** so parents can sleep and work
- **"Dadi-on-call"**: an experienced mentor for everyday doubts
- **Remote family dashboard**: grandparents see visit logs, photos, milestones
- Back-to-work plan, trusted nanny matching after month 3
- Grocery & pharmacy reminders, appointment cab booking
- Paternity-support tips and a dad checklist

Joint family

Elders at home with strong traditions and many hands to help.

- **Elder orientation session**: keep valued traditions, avoid unsafe ones (e.g. kajal in eyes, honey for newborns)
- Traditional daai-maa massage that elders recognise, with modern hygiene
- **Shared family account** with roles: mother, husband, mother-in-law, caregiver
- Hindi / Punjabi-speaking staff; festival-aware scheduling
- Ceremony coordination: godh bharai, chhati, naming, mundan
- Diet plans that fit the family kitchen

Family roles in the app

ROLE	CAN SEE	CAN DO
Mother (owner)	Everything	Book, pay, share records, manage consent
Partner	Plan, schedule, reports (if shared)	Book, pay, chat with care manager
Family member (e.g. mother-in-law, NRI parent)	Schedule, visit logs, photos	Message; no medical records unless the mother allows
Caregiver (assigned)	Today's checklist, care notes	Check-in / out, log vitals & activities

> Privacy by design: the mother controls who sees health data, in line with the consent requirements of the DPDP Act 2023.

09 · PLANS & PACKS

One complete plan, or just what you need

Not every family needs 18 months. Plans load **Care Credits** into the wallet; à-la-carte bookings and add-ons can be paid or redeemed at any time.

PREGNANCY · 9 MONTHS

Garbh

₹24,999

- Monthly → weekly nurse visits
- Dietitian plan, reviewed each trimester
- Scan & test scheduling, report vault
- Yoga ×8, childbirth class

POST-DELIVERY · 40 DAYS

Sutika

₹19,999

- 30 baby massages + first bath
- 8 mother massages
- 3 nurse visits + 1 lactation visit
- EPDS screening, sutika diet

POST-DELIVERY · 3 MONTHS

Navjaat 3

₹29,999

- Everything in Sutika
- + 24 massages (months 2–3)
- Vaccine & growth tracking
- 2 physio sessions

BABY + MOTHER · 12 MONTHS

Pehla Saal

₹49,999

- Navjaat 3 included
- Monthly nurse growth visit
- Weaning & diet plans
- Paeds tele-consults ×6, babyproofing

BEST VALUE

COMPLETE · 18 MONTHS

Sampoorna

₹69,999

- Garbh + Pehla Saal
- Dedicated care manager
- Priority booking, 10% bonus credits
- Family dashboard + Dadi-on-call

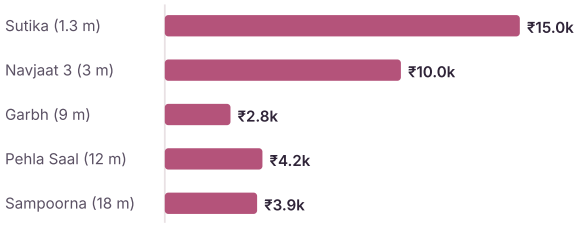

PAY AS YOU GO

À la carte

from ₹499

- Single baby massage ₹499
- First bath ₹699 · Nurse visit ₹799
- Lactation ₹1,199 · 10 massages ₹4,499
- Japa shifts monthly (see add-ons)

Value per month of care (indicative)

Long plans give a lower monthly cost, which encourages upgrades. Japa shifts are billed separately.

Pricing levers

- **EMI / monthly instalments** for Sampoorna & Pehla Saal
- **Upgrade credit:** the unused value of a small pack carries into a bigger one
- **Gift a plan:** gift cards for baby showers and family
- **Corporate maternity benefit** (B2B), billed to the employer
- **Missed-visit guarantee:** automatic credit if we're late or absent
- Zone-based pricing configurable in the admin

10 · GROWTH

Referral & growth engine

Mothers trust other mothers. Referral is the primary acquisition channel, supported by partnerships with doctors and hospitals.

Customer referral flow

1 · Share
Mother shares her code / link (WhatsApp, Instagram).

→

2 · Join
Friend signs up, gets ₹500 credits on first booking.

→

3 · Book
Friend completes first paid service ≥ ₹999.

→

4 · Reward
Referrer gets ₹500 credits; ₹2,000 if the friend buys a plan.

Customer → customer

Two-sided credits, family invites, milestone badges ("3 friends helped").

Doctor / hospital → customer

Partner-specific QR codes at OPD & discharge desk. Partner earns commission per plan; tracked in the admin.

Caregiver → caregiver

Staff referral bonus for recruiting trained daais and nurses after their 60-day retention.

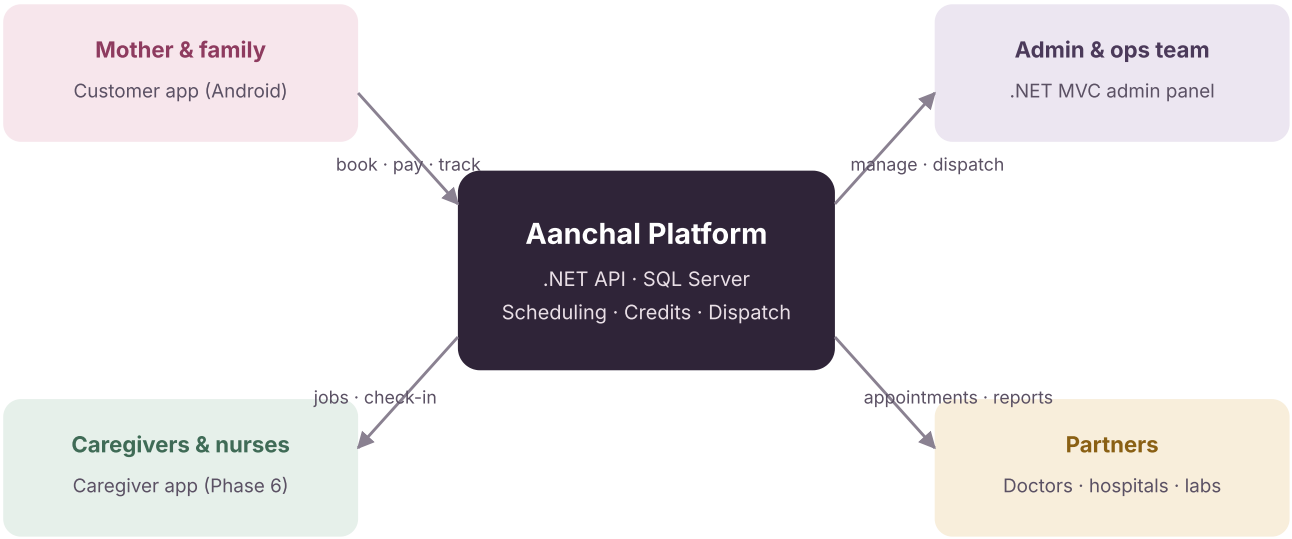

Other channels

- Free **pregnancy-care camps** in RWAs & sectors, with a nurse BP/Hb check
- Instagram content in Hindi/Punjabi: "Dadi ke nuskhe vs doctor ki salah"
- Corporate HR tie-ups: IT parks in Mohali, Panchkula IT Park, Chandigarh offices
- Pharmacy & baby-store counters with QR
- Google Business profile per hub; SEO for "baby massage Mohali" etc.

Referral controls (admin)

- Campaign rules: reward amount, eligibility, expiry, caps
- Fraud checks: same device / phone / address, self-referral
- Partner commission ledger & monthly payout report
- Coupon codes by zone and channel; conversion funnel

ADMIN ROLE	RESPONSIBILITIES
Super admin	Settings, pricing, zones, roles & permissions, finance
Hub manager	Daily dispatch, caregiver shifts, escalations in their zone
Care manager	Owns 40–60 families: onboarding call, plan, weekly check-in
Clinical lead (nurse)	SOPs, vitals alerts, red-flag escalation to partner doctors
HR / training	Recruitment funnel, KYC, police verification, academy, certification
Support & finance	Tickets, refunds, partner commissions, caregiver payouts

Product modules

Customer app

React Native · Android first

- OTP login, onboarding by due date / baby DOB
- Family members & roles
- Home: stage card ("Week 22"), next visit, tips
- Plans, packs, add-ons catalogue
- Booking: service → timing → slot → pay
- Live visit status, caregiver profile
- Health vault: reports, prescriptions, scans
- Trackers: kicks, weight, BP, feeds, sleep, diapers, growth, vaccines
- Diet plan & daily meal checklist
- Appointments with partner doctors / labs
- Wallet, Care Credits, referral, gift a plan
- Chat / WhatsApp support, SOS button
- Ratings, complaints, invoices
- Hindi, Punjabi, English

Caregiver app

Same RN codebase, role-based · Phase 6

- Shift calendar & job list
- Navigation to home; OTP / geo check-in
- Visit checklist per service SOP
- Log vitals, feeds, massage, photos
- Red-flag button → clinical lead
- Training modules & certification status
- Earnings, incentives, leave
- SOS for caregiver safety

Until Phase 6, hub managers update visits from the admin panel.

Admin panel

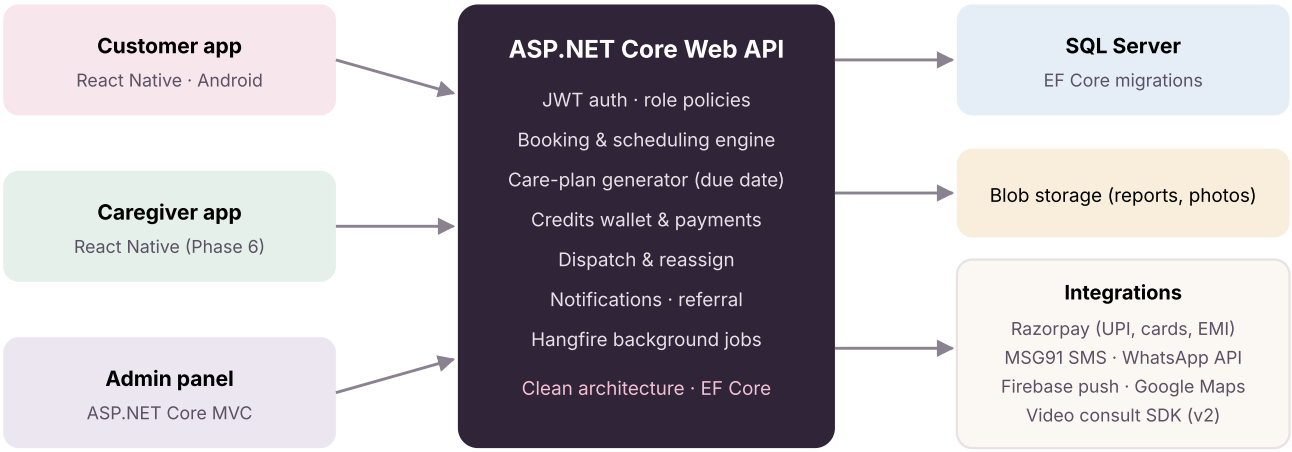

.NET MVC · Bootstrap

- Dashboard KPIs & alerts
- Customers, families, pregnancies, babies
- Bookings & dispatch board, auto-reassign
- Caregivers: recruitment → KYC → police check → training → shifts
- Partners & commission ledger
- Services, packages, add-ons, pricing by zone
- Zones / hubs
- Payments, refunds, credits, invoices (GST)
- Referrals, coupons, campaigns
- Content: diet templates, articles, SOPs
- Reviews, tickets, SLA timers
- Reports & exports; audit log
- Roles & permissions

MVP vs. later

RELEASE	SCOPE
MVP (pilot)	Onboarding, plans & à la carte booking, payments, Care Credits, visit logs, basic trackers (kicks, feeds, vaccines), referral, admin core (bookings, caregivers, packages, customers, partners)
v1.1	Diet plans, health vault, partner appointments, family roles, WhatsApp notifications, EPDS screening
v2	Caregiver app, live tracking, tele-consult, corporate B2B portal, Hindi/Punjabi UI, iOS

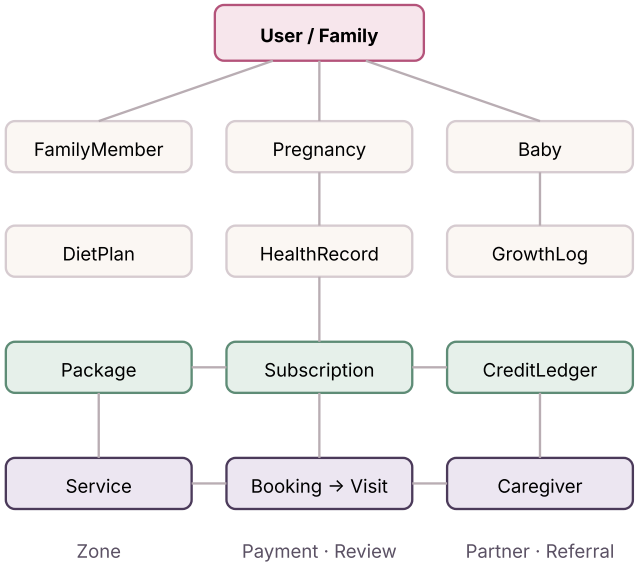

Architecture & data model

Solution structure

Aanchal.Core	Entities, enums, domain rules, interfaces
Aanchal.Application	Services, DTOs, validation (FluentValidation), mapping
Aanchal.Infrastructure	EF Core DbContext, repositories, payment & SMS adapters
Aanchal.Api	REST controllers, JWT, Swagger, rate limits
Aanchal.Admin	MVC + Razor views (Bootstrap template), cookie auth
Aanchal.Mobile	React Native app (TypeScript, React Query)

Core entities

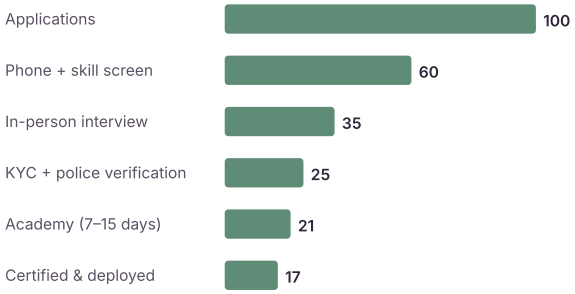

Non-functional

- DPDP Act consent, encryption at rest for health data, audit log
- Role-based access; health data visible only to permitted roles
- Azure App Service + Azure SQL (or a VPS in India), daily backups
- CI/CD with GitHub Actions; staging + production

Caregivers: hiring, training & quality

Trust is the product. Every caregiver who enters a home is screened, trained, certified and monitored.

Recruitment funnel (per 100 applicants)

Planning assumption, modelled on Pronto's ~1 in 6 selection rate[1].

Aanchal Academy tracks

Daai-maa 7 days	Traditional massage technique, safe oils, bathing, cord & nail care, hygiene, newborn red flags (jaundice, fever, breathing)
Japa 10 days	Newborn feeding support, burping, sleep, mother's recovery care, sutika diet basics, safe sleep
Nurse GNM/ANM + 5 days	Aanchal clinical SOPs, vitals, EPDS, wound care, escalation protocol, app use
All	Soft skills, privacy, family etiquette, app use, safety & SOS, monthly refreshers

Quality controls

- OTP check-in / out
- Checklist per visit
- Rating after every visit
- Random supervisor audits
- Re-training below 4.3★

Caregiver welfare

- Fixed salary + incentives
- Health & accident insurance
- Guaranteed shifts
- Career path: daai → senior → trainer
- Safety SOS

Service SLAs

- On-time arrival ≥ 95%
- Backup caregiver within 2h
- Nurse callback in 15 min (helpline)
- Complaint resolution < 24h
- Refund / credit < 48h

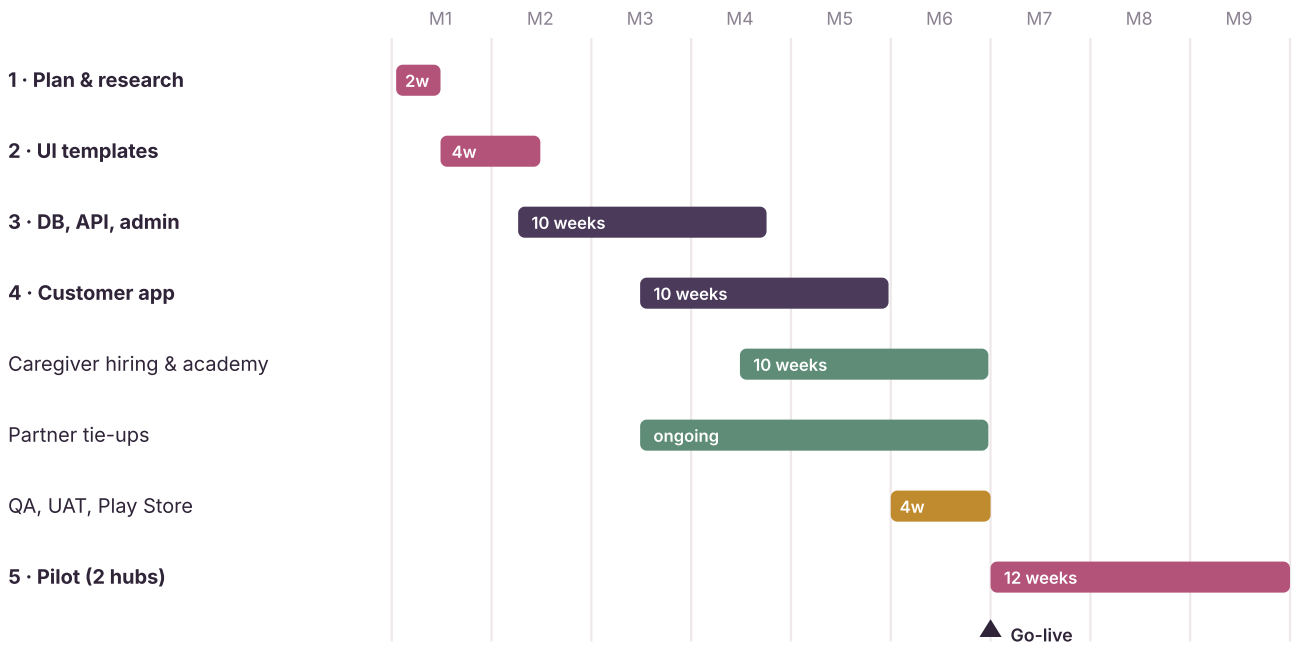

Pilot team (2 hubs)

12 daai-maa · 6 japa · 3 nurses · 2 care managers · 1 hub manager · 1 clinical lead (part-time) · 1 support executive · dietitian & physio as partners.

15 · DELIVERY PLAN

Roadmap

About 9 months from plan sign-off to a running pilot; Phases 3 and 4 overlap to save time.

Phase 1–2 · now

- This project plan (PDF)
- Landing, admin & user templates
- Client sign-off on scope & brand

Phase 3–4

- DB schema & EF migrations
- REST API + Swagger
- Admin panel on the approved template
- RN customer app MVP

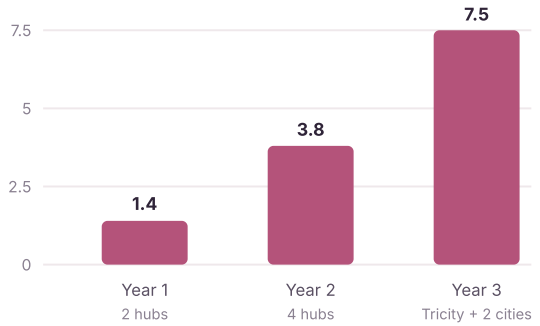

Phase 5–6

- Pilot: Chandigarh + Mohali
- Target 150 families in 3 months
- Caregiver app, Panchkula & Zirakpur
- Then Ludhiana, Jalandhar

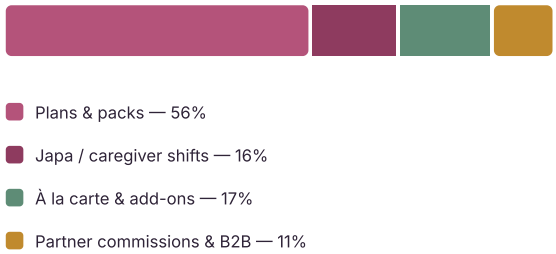

Revenue model & projections

Revenue comes from plans, à la carte services, japa shifts and partner commissions. All figures below are **illustrative assumptions** for discussion and must be validated in the pilot.

Revenue projection, ₹ crore (assumption)

Year-3 revenue mix (assumption)

ASSUMPTION	YEAR 1	YEAR 2	YEAR 3
Families served (plans)	~270	~650	~1,100
Average plan value	₹32k	₹35k	₹38k
À la carte bookings / month (avg)	~300	~800	~1,500
Target gross margin (services)	25%	32%	38%
Caregivers on payroll	~25	~60	~120

Indicative build cost (Phase 3–4)

Team of 1 tech lead (.NET), 1 .NET dev, 1 RN dev, 1 UI/QA, part-time PM for ~5 months. Cloud + third-party APIs ≈ ₹15–25k/month at pilot scale. Detailed estimate to follow after scope sign-off.

Unit economics to prove in pilot

CAC < ₹2,500 · plan conversion from à la carte ≥ 25% · caregiver utilisation ≥ 70% · NPS ≥ 60 · repeat / referral share ≥ 40%.

KPIs & risk register

150	≥ 4.6★	≥ 95%	≥ 40%
families in the 3-month pilot	average visit rating	on-time visits	new families via referral

AREA	KPI	TARGET
Growth	Monthly new families · plan conversion · referral share	+25% MoM · 25% · 40%
Quality	Rating · complaints per 100 visits · repeat booking	4.6 · < 2 · 60%
Operations	Caregiver utilisation · backup within 2h · attrition	70% · 98% · < 5%/month
Clinical	Red-flag escalation time · EPDS screening coverage	< 30 min · 100%
Finance	CAC · gross margin · collection on time	< ₹2,500 · 25%+ · 98%

Risk register

RISK	IMPACT	MITIGATION
Safety incident with a baby or mother	High	Clinical SOPs, doctor clearance before massage/bath, red-flag escalation, insurance, incident review
Caregiver supply & attrition	High	Fixed pay + insurance, career path, referral bonus, academy pipeline ahead of demand
Trust in a new brand	Medium	Hospital & doctor partners, verified badges, free first visit, camps, testimonials from pilot
Price sensitivity	Medium	₹499 entry service, small packs, EMI, corporate benefit
Health-data privacy (DPDP Act)	Medium	Consent flows, encryption, role-based access, data-retention policy, legal review
Scope creep / medical liability	Medium	No diagnosis by caregivers; nurses within scope; doctors via partners; clear T&Cs
Competitor entry (UC, Apollo)	Low–Med	Local depth, partner network, 18-month relationship, regional language & tradition

Decisions needed & next steps

Client decisions

1. Final brand name (Aanchal / MaaSathi / Navya Care) and domain
2. Approve service catalogue & MVP scope
3. Approve indicative pricing for pilot
4. Pilot zones: Chandigarh + Mohali?
5. First partner hospitals, labs & doctors to approach
6. Hosting: Azure vs. Indian VPS

Next 4 weeks

1. Review UI templates (landing, admin, user)
2. 50 interviews with expecting / new mothers in Tricity
3. Shortlist 20 daai-maa & 5 nurses; design academy
4. Legal: company setup, T&Cs, privacy policy, caregiver contracts
5. Finalise DB schema & API contracts; start Phase 3
